

## WHAT'S NEW

### HEALING HONEY

Hoof injuries and fungal infections are common problems for horses. **MeliHeal All Purpose Healing Salve** is made from honey, lanolin and a unique blend of essential oils. Honey has natural anti-bacterial properties, while lanolin softens tissue to promote healing, and is important for the re-growth of hair. The essential oils increase circulation to the wound to reduce swelling and

prevent scar tissue and proud flesh. Recommended for use on rain rot, ringworm, thrush and injuries to the hoof wall and sole. [www.meliheal.com](http://www.meliheal.com)

### TREATS FOR A REASON

**Buckeye Nutrition** recently introduced its **Reasons** line of healthy treats for horses. Hoof Support contains biotin; Joint Support contains glucosamine, chondroitin and MSM; and Immune Response features a beneficial herb blend.
